Tools for Determining Base Flood Elevation (BFE), Letters of Map Change (LOMC) Basics, FEMA Map Service Center

[Registration Link](#)

Training on methods for determining base flood elevation in AE, A1-30, and V Zones using the FIRM/FIS and other resources, including tips for developing BFEs for A Zones. An overview of Letters of Map Change will be given. This session will also demonstrate how to use FEMA resources like the Flood Map Service Center. This beginner training is recommended for those new to floodplain management.

Elevation Certificate Basics

[Registration Link](#)

Section-by-section basics of the FEMA Elevation Certificate form, including building diagram selection, lowest floor, and common errors. Session demonstrates the proper way to complete the FEMA Elevation Certificate and best practices for using the EC in the floodplain development review process.
